Alternative armrests

R-Go Tools Ergonomic Armrest is the alternative to the armrests on your chair. The angle ensures that your arms are being supported close to the body during computer work. This creates a straight working position and a natural posture of the shoulders.

- **Suitable for several desktops**

You can attach the R-Go Tools Ergonomic Armrest to all conventional desktops.

- **Mounting included**

Included mounts are suitable for desks with a frame or cable tray at the bottom, and for thicker desktops.
