

Discover the circular R-Go Smartbar monitor arm

R-Go Smartbar monitor arm

Healthy working with two screens

Designed according to the principles of circularity

Certified 100% circular

The Smartbar is designed so that the materials can be easily separated for recycling. The packaging is foldable and 100% cardboard.

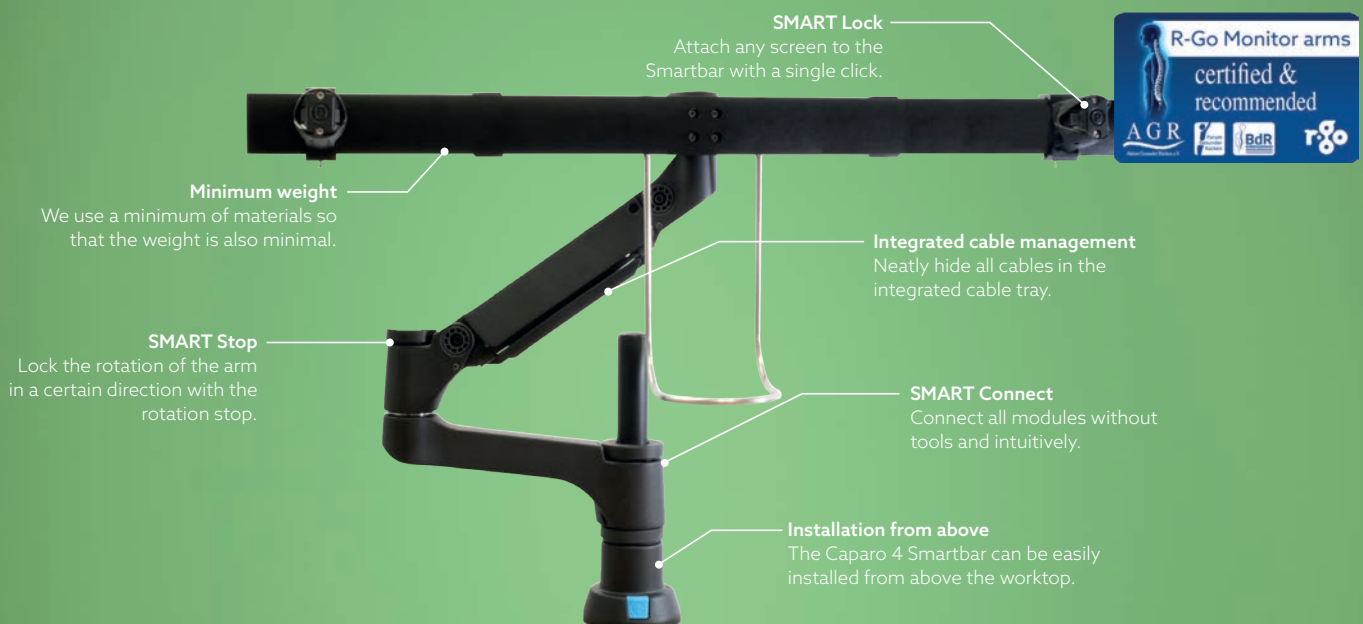

Modular design

Easily expandable to suit your needs with a document holder or laptop holder. Modules can be easily replaced, repaired or upgraded.

Easily adjustable

Easily adjustable in depth and height. Screens can tilt and swivel as desired. The Caparo arm is equipped with a gas spring.

Healthy working with 2 screens

Prevents bad posture

Did you know that the wrong set-up of your monitors has a direct effect on your working posture? A hunched or twisted posture can easily lead to neck and back pain. Using a monitor arm with Smartbar, you can raise your monitors to eye level. This way, you will automatically adopt an upright working posture.

R-Go Smartbar

The R-Go Smartbar allows you to quickly and easily adjust two monitors to the correct height at the same time. So everyone can work ergonomically with 2 screens.

With attention for the environment

- ✓ Our monitor arms are made from almost 100% recycled raw materials.
- ✓ Designed to last: made from premium materials for long life.
- ✓ We offset the CO2 emissions caused by the production of our monitor arms. To do this, we plant trees together with non-profit organization **One Tree Planted**.
- ✓ **Lifetime recycling guarantee**: we make sure that our monitor arms are recycled upon delivery at the end of their lifespan.
