Reference: RGOBRHESML

EAN number: 8719274491354

- With break indicator
- Natural ergonomic shape
- Stimulates blood circulation
- Different sizes, left and right
- Customizable buttons

The R-Go HE Break Mouse is an ergonomic vertical mouse with integrated break software. This smart mouse helps you to remember when it is time to take a break. The ergonomic R-Go HE Break mouse has a vertical position, which allows you to move the mouse automatically with your forearm instead of just your hand. This prevents strain injuries, such as RSI complaints. The HE Break mouse has a round shape, so that your hand and wrist are in a natural, relaxed position. The mouse fits comfortably in your hand and supports all fingers. Are you left- or right-handed? We have different versions and sizes available.

The LED colour signals in the mouse indicate how healthy you are working and when it is time to take a break. The mouse encourages you to take frequent breaks. These vital breaks help prevent fatigue, stress of muscles and tendons, stimulate the body's circulation and keep you fit throughout your working day. During mouse usage, the light changes colour like a traffic light. Green light means you're working healthily, orange means it's time to take a break, red light means you've been working too long. By using these subtle colour signals, you will receive simple and positive feedback about healthy (break) behaviour. For more information, visit our R-Go Break page.

This product works together with the R-Go Break Software that won the Benelux Office

Products Award 2021.

- With break indicator
