

R-Go Numpad Break

Black, Wireless

Reference: RGOCONMWLBL

EAN number: 8719274491569

- With break indicator
- Flat design
- Easy to carry
- Can be used separate or with R-Go Split Break/ R-Go Compact Break

Experience maximum freedom while typing with the R-Go Numpad Break. You can operate this numeric keyboard with your left or right hand and choose where you want to place it on your desktop.

By using your non-dominant hand to operate the numeric keypad, both hands remain within shoulder width while working and the load is spread over both hands. Ideal in combination with the R-Go Compact Break and R-Go Split Break keyboard. The ultra-thin design ensures that your wrist is in a natural, flat position while typing. The special scissor mechanism in the keys provides a light keystroke, so you need less strength to type. The R-Go Numpad includes a built-in break indicator, which indicates with colour signals (green, orange, red) when it's time to pause your work. For more information visit our [R-Go Break page](#).

ERGONOMIC DESIGN: The ultra-thin design of this numeric keypad allows your wrist to have a natural flat position while typing. This allows you to type without pinching blood vessels and tendons.

WITH BREAK SOFTWARE: Prevents complaints by encouraging you to take breaks. This numpad has patented break software and indicates with color signals when it is time to take a

break. The R-Go Break software has won the Benelux Office Award in 2021.

LIGHT KEYSTROKE: The special scissor mechanism in the keys provides a light keystroke, so you need less muscle power to type.

WITH A HEART FOR OUR ENVIRONMENT: R-Go Tools keyboards are made from recycled plastic.

COMPATIBLE: This numpad is available wired and wireless. The wired numpad is easy to connect with the 1.5m USB cable. The wireless version works with Bluetooth connection. Can be used separately or with R-Go Break keyboards.
